

Programme

CIA Sustainability Conference 2024 - 26 September

Hilton Hotel, Neville Street, Leeds

Target audience

Join us at our annual Sustainability Conference offering a unique platform to gain insights into the latest sustainability trends and technologies shaping the chemical industry. We will explore ground-breaking innovations, best practices and strategic collaborations that are driving sustainability within the sector. Hear from a variety of speakers on how to shape a greener, more sustainable future for industry.

Conference Highlights:

- **Sustainability Case Studies:** Hear from industry visionaries and sustainability experts who are pioneering advancements in green chemistry, the circular economy and sustainable supply chains.
- **Sustainability Reporting:** The 'alphabet soup' of reporting can be daunting, therefore we will be breaking down the complexities of nature and corporate disclosures.
- **Panel Discussions:** Engage in a discussion about careers in STEM, exploring the perspectives of those with varying degrees of experience.
- **Exhibitors:** Join companies and service providers to discover solutions to the challenges facing industry.
- **Networking Opportunities:** Connect with peers, potential partners, and key stakeholders to exchange ideas and forge partnerships that can accelerate the journey towards a sustainable future.

Who Should Attend:

- Chemical industry professionals, including researchers, engineers, and executives.
- Sustainability officers and environmental managers.
- Policymakers and regulatory officials.
- Academics and students focused on chemical engineering and environmental sciences.
- Entrepreneurs and innovators in the green tech and chemical sectors.
- Anyone with an interest in the transition to Net zero and the broader sustainability agenda!

Registration & exhibition information with full agenda coming soon!

Draft programme

09:00	Registration, coffee and exhibitors
09:45	Welcome and Introduction <i>Helen Coy, Innospec (Conference Chair)</i>
09:55	Exploring the benefits that can be had from increased collaboration and engagement along the supply chain through a case study of the Pharmaceutical LCA Consortium: a notoriously complex and regulation-heavy industry. <i>Christopher Porter, SLR</i>
10:15	Corporate Reporting: CSRD and double materiality <i>Melina Papapanou, Cefic</i>
10:35	Nature Reporting: TNFD from the perspective of an early adopter <i>Fraser Wilkinson, SLR</i>
11:00	COFFEE BREAK
11:30	Panel discussion: Careers in STEM <i>Lucy Jones, Croda (CIA Chem Talent)</i> <i>Sameen Barabhuiya, Nufarm (CIA Chem Talent)</i> <i>Joy Parvin, CIEC</i>
12:30	LUNCH BREAK
13:30	Safe and Sustainable by Design <i>Jonathon Jagger, Mitsubishi Chemicals</i>
14:00	Industrial Biotechnology for Sustainable Chemical Production at Johnson Matthey <i>Annette Alcasabas</i>
14:25	The energy outlook from a chemicals perspective <i>Onsite Energy</i>
14:50	COFFEE BREAK
15:20	Flue2Chem: Project update <i>Catriona McAulay, Reckitt</i>
15:50	Concluding remarks <i>Helen Coy, Innospec (Conference Chair)</i>
16:00	CLOSE
